

ISCED Fields of Education and Training 2013

ISCED Fields of Education and Training' classifies education programmes and related qualifications by fields of study. A field is the "broad domain, branch or area of content covered by an education programme or qualification".

Fields of education and training, and levels of education or educational attainment are cross-classification variables within ISCED and are therefore independent of each other. This classification has been designed principally to describe and categorise fields of education and training at the secondary, post-secondary and tertiary levels of formal education as defined in ISCED 2011, though it may be used for classifying programmes and qualifications offered at other levels. The classification may also be used in other contexts, for example to classify the subject matter of non-formal education, initial and continuing vocational training, or informal learning.
