

## Course Syllabus

### **Global Sexual, Reproductive Health and Rights 15 Credits\*, Second Cycle**

#### **Learning Outcomes**

Upon completion of the course, students will be able to:

- describe basic concepts in global sexual, reproductive health and rights as well as evidence based interventions and global health policy programmes that promote sexual and reproductive health
- apply different disciplinary perspectives, theories and methods that include gender and gender perspectives in the subject area
- analyse and discuss, from the perspective of rights, how social, economic, environmental, behavioural and political factors affect the health of mothers, children and teenagers; sexually transmitted diseases; family planning; and abortion care
- present and argue for the proposed design of a research project and put this in relation to ethics, diversity issues and sustainability.

#### **Course Content**

Students will analyse global issues in a course that describes the evidence base for major interventions in the field. They will write a project plan in the area of study that includes methodological and ethical aspects.

#### **Assessment**

Seminars, project plan and written assignments.
