

## Course Syllabus

### **Implementation of New Practices in the Health Care and Social Care Sector 7.5 Credits\*, Second Cycle**

#### **Learning Outcomes**

The overall goal of this course is for the student to gain advanced knowledge and understanding of the implementation of research-based knowledge in clinical practice.

After completion of the course, the student shall:

- have insight into what facilitates and hinders the implementation of evidence in health care and social services,
- be able to suggest strategies for facilitating implementation and overcoming barriers for evidence-based practice in health care and social services,
- be able to critically reflect on the need for implementation research in health care and social services, and
- have knowledge of scientific methods which can be used for knowledge implementation.

#### **Course Content**

The course includes:

- what evidence is and how it relates to other knowledge
- which strategies exist to facilitate the implementation of knowledge in practice and what is known about their effectiveness
- what implementation science is and its relation to intervention studies
- which theoretical frameworks exist for implementation and how they can support the implementation of evidence in practice and/or implementation science
- research design and methods in the area of implementation.

#### **Assessment**

Formative assessments in conjunction with seminars, including being an opponent of and defending a plan for implementation in a project or a research study within the framework of the course.

#### **Forms of Study**

Individual studies, work in pairs/study groups, lectures, and seminars.

**Grades**

The Swedish grades U–G.

Grades U (failed) – G (passed).

Number of credits:

- Oral presentation, project work, discussant on another work, 7.5 credits.

**Prerequisites**

A minimum of 90 credits in caring science, medicine/medical science, social work or social care at first cycle level, including a degree project comprising at least 15 credits

**Other Information**

The course is taught over the Internet, which requires that students have a reliable Internet connection and can communicate using speakers, microphone and web camera via a computer or similar device.

**Subject:**

Caring Science

**Group of Subjects:**

Nursing Science

**Disciplinary Domain:**

Health Science, 100%

**This course can be included in the following main field(s) of study:**

1. Care Sciences
2. Social Work

**Progression Indicator within (each) main field of study:**

1. A1N
2. A1N

**Approved:**

Approved 24 February 2021  
Valid from 24 February 2021

**Revised:**

Revised, 2 March 2021  
Revision is valid from 2 March 2021
